

## Pin Worm Collection Guidelines

### Collection Materials:

- 2 - Slide with Transparent Scotch Tape
- Wooden Depressor
- Slide Box
- Patient ID Label
- Biohazard Lab Bag

### Collection Directions:

1. The best time to collect Pin Worms are between 10-11pm or a few hours after falling asleep. Or in the early morning before a bowel moment. Collections at each time are acceptable and two slide preparations are in the collection kit.
2. Hold slide against wooden depressor one inch from the end and lift long portion of tape from the slide.
3. Loop the tape over the end of the wooden depressor exposing the sticky side of the tape.
4. Hold tape and slide against wooden depressor, press the sticky side against several areas of the perianal region.
5. Replace tape on slide. Smooth tape.
6. Fill out the provided label with Full First and Last Name, Date of Birth, Date and Time of specimen collection.
7. Place the label on the slide box. Do not place label on glass slide with pin worm sample. Place the specimen into the provided biohazard bag.
8. Bring the specimen to a Genesis Laboratory location as soon as possible for best results.
9. Complete a Patient Registration at the front desk, and then drop off the specimen at the Laboratory.
