Legacy LabAlert

December 2023

An Important Update from Legacy Laboratory Services

As Legacy Laboratory transitions to Labcorp, send out orders will be converting from ARUP and MAYO to Labcorp.

These changes will occur in phases with a target date of Winter/Spring 2024. There is not any impact to any of the testing being performed in the local Legacy core laboratory with this lab alert.

Phase 1 - Tests may need to be built in your system.
Not all tests require a test build but may include specimen collection changes.

Phase 2 – Adding information on specimen collection requirement changes to tests built.

Information regarding these updates will be coming to you shortly.

Please ensure your IT contact information is current with Legacy Laboratory.

As these updates are rolled out, your Account Service Representative (ASR) will be in direct communication with you on any of the specific tests that would impact your practice. Your ASRs are available to discuss this change if you have further questions.

For additional information, please contact your account representative, client services or consult [the test table](#) on our website.
