

| CODE    | TEST NAME                                                                                                                                                                                                                             | CPT4 CODE         |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| LAB3001 | VAGINAL PATHOGENS DNA PROBE<br>Temperature:Sample to lab within 72 hours at 2-30 C.<br>Performing Laboratory:CHI Health Laboratory                                                                                                    | 87510 87480 87660 |
| LAB24   | VALPROIC ACID LEVEL, TOTAL<br>Container:One 5 mL serum separator (Gold) or one 3 mL plasma separator tube (Light Green) (Min: 1.0 mL whole blood)<br>Temperature:Refrigerated<br>Performing Laboratory:CHI Health Laboratory          | 80164             |
| LAB41   | VANCOMYCIN, PEAK<br>Container:One 5 mL serum separator tube (gold) or one 3 mL plasma separator tube (light green) (Min: 1.0 mL whole blood)<br>Temperature:Refrigerated<br>Performing Laboratory:CHI Health Laboratory               | 80202             |
| LAB40   | VANCOMYCIN, RANDOM<br>Container:One 5 mL serum separator tube (gold) or one 3 mL plasma separator tube (light green) (Min: 1.0 mL whole blood)<br>Temperature:Refrigerated<br>Performing Laboratory:CHI Health Laboratory             | 80202             |
| LAB39   | VANCOMYCIN, TROUGH<br>Container:One 5 mL SST or one 3 mL PST (Min: 1 mL)<br>Temperature:Refrigerated<br>Performing Laboratory:CHI Health Laboratory                                                                                   | 80202             |
| LAB162  | VARICELLA ZOSTER ANTIBODY, IGG<br>Container:5 mL serum separator tube (gold) or one 3 mL plasma separator tube (light green) (Min: 1.0 mL whole blood)<br>Temperature:Room Temperature<br>Performing Laboratory:CHI Health Laboratory | 86787             |
| LAB163  | VARICELLA ZOSTER ANTIBODY, IGM<br>Performing Laboratory:LABCORP BURLINGTON                                                                                                                                                            |                   |
| LAB2276 | VARICELLA ZOSTER VIRUS BY PCR<br>Performing Laboratory:LABCORP BURLINGTON                                                                                                                                                             |                   |
| LAB3216 | VARICELLA-ZOSTER IGG & IGM<br>Performing Laboratory:LABCORP BURLINGTON                                                                                                                                                                |                   |
| LAB1107 | VASOACTIVE INTESTINAL PEPTIDE (VIP)<br>Container:Lavender Tube (EDTA)<br>Performing Laboratory:Mayo Laboratories                                                                                                                      | 84586             |
| LAB207  | VDRL, CSF<br>Performing Laboratory:LABCORP BURLINGTON                                                                                                                                                                                 |                   |
| LAB580  | VITAMIN A<br>Container:5 ml serum separator tube (Gold) or 3 ml plasma separator tube (Light Green); Also acceptable Lavender (EDTA) or Pink (K2EDTA)<br>Temperature:Refrigerated<br>Performing Laboratory:ARUP                       | 84590             |
| LAB125  | VITAMIN B1, PLASMA<br>Container:Green (Sodium or Lithium Heparin), Lavender (EDTA), Plasma separator tube<br>Temperature:Frozen<br>Performing Laboratory:ARUP                                                                         | 84425             |
| LAB745  | VITAMIN B1, WHOLE BLOOD<br>Performing Laboratory:LABCORP BURLINGTON                                                                                                                                                                   |                   |
| LAB67   | VITAMIN B12<br>Container:One 5 mL serum separator tube (gold) or one 3 mL plasma separator tube (light green) (Min: 1.0 mL whole blood)<br>Temperature:Refrigerated<br>Performing Laboratory:CHI Health Laboratory                    | 82607             |
