PRL	LAB13(BF)	Cytology, Body Fluid Container: For small fluid accumulations the entire specimen is submitted for laboratory evaluation. For larger effusions, 50-200 mL of well-mixed fluid should be sent for cytologic examination; however, the entire specimen is also acceptable. An entire jug of fluid is preferred to ensure that we have any adequate sample that minimizes the risk of a false negative interpretation and that there is sufficient material to perform all ancillary testing required. All fluid specimens must be transported in accordance with OSHA regulations for biohazardous substances.
